

React Task: Advanced Text Analyzer App

Objective: Build a React app that analyzes text input in real-time and provides detailed statistics along with a submission history panel, advanced editing tools, and persistent storage using localStorage.

Functional Requirement

1. Text Input Area

- * Controlled textarea input
- * Max length: 2000 characters
- * Supports both typing and pasting text

2. *Live Stats Panel* (updates as user types):

- * Word Count (non-empty tokens)
- * Character Count (with spaces)
- * Character Count (without spaces)
- * Sentence Count (based on ., !, ?)
- * Paragraph Count (based on \n\n or double line breaks)

3. *Submit Button*

- * Enabled only if:
 - * At least 10 word
 - * At least 1 complete sentence (ends with ., !, or ?)

- * Text does not end in an incomplete sentence

4. *Clear Button*

- * Clears the textarea and resets the stats

5. *Submission History Panel*

- * Shows the last 5 valid submissions
- * Displays:
 - * First 10 words
 - * Word count, sentence count
 - * Each history item has delete and restore buttons

6. *Download Summary*

- * Downloads a .txt file of the current text with its stats

7. *Highlight Panel*

- * Highlights:
 - * Longest sentence
 - * Most frequent word

Bonus Features

8. *Auto-save Draft*

- * If user leaves mid-typing, resume last input from localStorage

9. *Session Typing Timer*

- * Display a visible timer that tracks *active typing time only*
- * Starts when user begins typing and pauses after inactivity of 5 seconds
- * Resets on clearing or submitting the form
- * Display format: Typing Time: 00:01:32

📊 Sample Output

plaintext

**Words: 74 | Chars: 433 | Chars (no spaces): 361 | Sentences: 4 |
Paragraphs: 2 | Typing Time: 00:01:42**

[Submit] [Clear] [Download Summary]

--- History ---

**#1: "Today is a great day to build something..." | Words: 18 | Sentences: 1 |
[Delete] [Restore]**

**#2: "React is powerful and flexible..." | Words: 21 | Sentences: 2 |
[Delete] [Restore]**

Rules

- * You can use standard React, JS, and browser APIs
- * Time limit: 1 hours
- * Ensure the app is responsive and accessible
